

## We are hiring!

### About us:

ept Services GmbH is a young, agile and well connected company with a lot of expert and trade know-how. Our notable customers appreciate our flexibility and the pleasure we take from doing our work well.

We are engaged in the business of power engineering and generate 80% of our turnover in the sector of renewable energy. Europe-wide we wire wind and solar parks, supply and equip concrete stations and electrical substations enabeling wind and solar parks to be put into operation. Moreover, we participate in the construction of the Offshore Windparks Global Tec 1 in the North Sea. We also perform the maintenance of energy distribution systems on container ships worldwide, and work for industrial enterprises in the North German region.

Our Workshop is located in Peterborough.

We are looking for **Electritians / Technicians** (High and Medium Voltage) and **Electricians Mate** as soon as possible.

The position involves being away on job assignments for the installation of medium-voltage and low-voltage systems.
